

Powderlux™ Specification Guide

Design-Driven Finishes. Delivered Through a Controlled System.

What is Powderlux™

Powderlux™ is a finishing system that brings high-end, aged-metal aesthetics to life through a network of certified applicators. We align design intent with real-world production to ensure consistent, scalable outcomes.

- All powder. No paint.
- No acids or liquid processes
- Repeatable at scale
- Architectural, exterior or interior

Why Designers Specify Powderlux™

Designed for fast, confident decision-making:

- Pre-developed finish families (Aged, Verdigris, Rust, Stone)
- Tiered systems for cost value or bespoke creation
- Repeatable results across regions
- Specifier-controlled outcomes using reference numbers

How Powderlux™ Compares

A simplified comparison across common finish approaches:

- Traditional Patina: authentic but inconsistent and labor intensive
- Single Powder Coat: durable but visually flat
- Powderlux™: scalable, durable, design-driven

Why Powderlux™ Works in 3D

A system built for both design intent and performance:

- Lightweight advantage using aluminum substrates
- Durability focused (UV, corrosion, environmental resistance)
- 20+ curated finishes ready to specify
- Scalable across projects and locations
- Greater flexibility from flat panel to 3 form design

Substrate Considerations

Powderlux™ can be applied across key architectural metals:

- Aluminum: lightweight, corrosion resistant, ideal for exteriors
- Steel: structural strength, requires proper pre-treatment

Project Planning with Certified Applicators

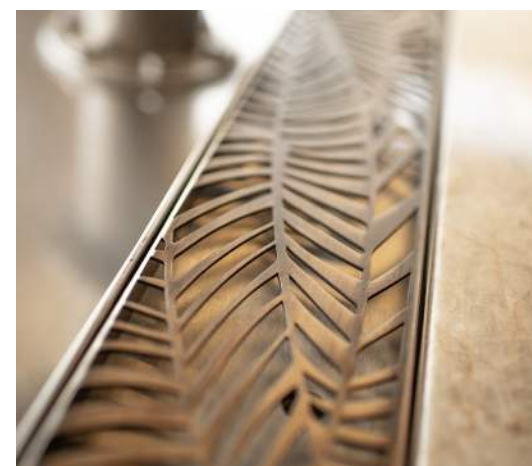

Key considerations when specifying:

- Ensure proper hang points and access for coating

Project Support

Powderlux™ simplifies complex finishes into a system designers can specify—and teams can deliver.

Request samples, connect with certified applicators, or submit your project for review. info@powderlux.com

- Match pre-treatment to environment
- Plan for slightly extended process time
- Protect surfaces during installation

How to Specify Powderlux™

Use Powderlux™ reference numbers from regional companion sheets:

- Specify by regional number code (note preferred sheen)
 - USA reference codes
 - UK/EU reference codes
- Check Tier Level Price Guide
- Confirm availability by region
- Do not substitute system or sequence
- Application by certified applicators only

Where to find Powderlux™

Powderlux™ is available worldwide including USA, U.K & the EU.

Other Benefits to Powderlux™

When design sensitivity is the driver only powder coating offers:

- Spec sustainable, environmentally friendly, VOC-free coatings
- Low maintenance, upkeep (resists fading, flaking & peeling)
- Lower cost barriers vs premium, limited resource metals
- Faster turnaround times, less redos than other options
- Historical restoration, UL & LEEDS compliant
